## ○ **Project: DoctorsFinder**

DoctorsFinder is a healthcare platform that enables users to search for doctors, view profiles, and book appointments online. As a software tester, I was responsible for ensuring the seamless functionality of core features like doctor search, profiles, and booking. My role involved reviewing requirements, creating and executing detailed test cases, performing functional and usability testing, and conducting cross-browser tests to ensure compatibility across different devices. I also identified and documented defects using JIRA, contributing to the overall quality and user experience of the website.

## ○ **Roles and Responsibilities:**

- Review Requirements: Analyse website features like doctor search, profiles, and booking to understand testing needs.
  - Create Test Cases: Develop and execute test cases for functional aspects.
  - Functional Testing: Test the website's core features like search, booking, and user profiles for accuracy.
  - Usability Testing: Ensure the site is easy to use and intuitive for users.
  - Cross-Browser Testing: Test the website on different browsers and devices to ensure compatibility.
  - Bug Reporting: Identify, document, and track defects using tools like JIRA.
- 

## ○ **Skills:**

- Types of Testing: Functional, Automation, Manual
  - Automation Platform: Web, API
  - Language: Java
  - Test Management tools: Jira, Bugzilla.
  - Technology for Automation & Framework: Selenium WebDriver.
  - IDE: Eclipse IDE
- 

## ○ **Education:**

### **Diploma in Software Testing & Automation:**

Tops Technologies, Ahmedabad.

05/2024 – Present

### **Bachelor of Engineering in Computer Science & Engineering:**

Gujarat Technological University, Ahmedabad.

07/2021 - Present
